

United Arab Emirates Market Opportunity

Who We Are

We are experts at delivering high quality, high care food around the world.

At MT Food Group we believe in collaboration, bringing together producers and consumers for a true farm to fork experience. Our team is very focused on working with every customer over the long term to help grow their business and secure consistent supply of high care premium food.

Dirk Geleit and Shirley Bastian started the company as red meat specialists trading under the name Meat Tender in 2008. The company rebranded as MT Food Group in 2021 to better represent the greater range of services and products we now offer our customers. As export specialists with more than 4 decades of industry experience, MT Food Group will assist you and your team to source an ideal range of premium products for your business through our extensive network of suppliers.

Delivering Premium Quality Australian Supply

Our customers are market leaders in their area who strive to deliver the highest standard of service to their clients. Working closely with our network of producers, plants and logistics, MT Food Group have been supplying Australian meat and other high care food to more than twenty countries worldwide for almost 15 years.

Globally Recognised Quality Control Systems

Australia's Quality Management systems operate under the globally recognised Quality Management Systems ISO 9001: 2000 and HACCP (Hazard Analysis Critical Control Point). All export approved producers, handlers and processors must have these HACCP procedures in place and are regularly audited for compliance.

Implementing Sustainable Supply Chain Solutions

Australian red meat is more than just good for you—the industry is also becoming more eco-friendly, with the goal of being carbon neutral by 2030. Greenhouse gas emissions have more than halved since 2005, the amount of water used to produce beef has fallen by 73% since 1985 and habitat biodiversity is increasing. This means consumers can enjoy Australian red meat knowing it's good for the environment.

Why us?

Sourcing Local • Delivering Globally

Top Paddock Lamb

At Top Paddock we believe that the lambs should be allowed to graze freely on the rich native grasslands and pastures of our region. This results in a naturally lean and tender lamb and a true farm to fork experience.

Beef & Veal

From the lush green pastures in the south to the broad open rangelands in the north, our unique terrain allows for consistent yearly supply and a diverse range of products, mainly from Angus and Hereford breeds.

Lamb & Mutton

It's no secret that Australian lamb is among the finest in the world. We source Australian Lamb, Mutton and Goat meat from specialty producers all over Australia and can offer year-round consistent supply.

The Range

At MT Food Group, we are expanding our range of premium food products to better help our customers source high quality items every day. This includes value added and further processed meat for retail, stocks and bone broths, poultry, smallgoods and more.

Seafood

Australia's seafood industry provides the world with over one billion seafood meals every year. We can help you find the perfect product to suit your customers, including premium fish, shellfish and caviar.

Dairy

Australia is well known for producing dairy products with excellent flavour from well managed sheep, goat and cattle herds, all produced in a clean and safe environment. Source cheese, milk, butter, cream and more.

Other Products

Pantry staples, butcher supplies and great Aussie pies. We have a selection of complementary products to diversify your range, including poultry, bone broth, cured meats and baked goods.

The Range

At MT Food Group, we are expanding our range of premium food products to better help our customers source high quality items every day. This includes value added and further processed meat for retail, stocks and bone broths, poultry, smallgoods and more.

A close-up photograph of a chef's hands carving a large, round piece of meat, likely a prime rib, on a wooden cutting board. The chef is wearing a brown uniform. A large, curved knife is being used to slice through the meat. The background is dark, and the lighting highlights the texture of the meat and the chef's hands.

Quality Control Promise

Australia's highly regarded quality control and management systems are globally recognised

Australia has world-class export protocols that have provided global industry benchmarks for ensuring the integrity of all certified export products.

These systems provide the structure for the reliable and transparent export of high care food products globally. In Australia our livestock are raised in an environment known for its clean production environment, pristine air and water, abundant feed and diversity of product.

Our government and industry regulatory bodies work together to ensure that no order can leave Australia without the appropriate inspection, accreditation and certification. This applies to all products, every shipment.

We can work together to grow your product range.

We work with some of the world's leading hotel groups, restaurants, five star airlines and the retail sector in over twenty countries, providing a comprehensive procurement service delivering red meat, seafood, dairy and other high care products from many of the best producers in the world, directly to the plates of consumers globally.

The team at MT Food Group will help to grow your business organically by sourcing products that complement your current range. As one of Australia's most trusted exporters of chilled and frozen food we understand the needs of our global customers very well.

We can help procurement and sales teams with everything from sourcing products and marketing strategy, to product training for in-house sales and production teams. We've also helped establish end to end cold chain solutions for our customers and understand QA compliance, documentation and logistics requirements thoroughly.
